

Milliken Contract Showroom (*1149), Merchandise Mart, Chicago, Illinois

"Milliken products ease the way to Leadership in Energy and Environmental Design (LEED) certification."

LEED® certification from the ground up

Milliken's environmental story is online at www.SustainableCarpet.com

Milliken Floor Covering

Can carpet change the world?

At Milliken Floor Covering, we believe it can. For decades, we've been reducing our own environmental footprint while innovating new products that last longer, use recycled and renewed materials, emit no harmful vapors and retire gracefully for an earth-friendly rebirth. Today, Milliken is the only carbon negative manufacturer in the industry.

We're so committed to environmental stewardship, even our NeoCon showroom is registered with LEED for Commercial Interiors.

When you're planning your own project with LEED certification in mind, Milliken carpet can help. In fact, no other carpet contributes more toward LEED.

Doing well by doing good.

When your project achieves LEED certification, your gift to the environment comes back to you.

- Substantial savings in energy and money over time
- You may qualify for state and local government initiatives
- Marketing exposure through United States Green Building Council (USGBC) and other channels

• A host of other possible benefits, from a competitive edge to a welcome change in employee health and involvement

With just a little planning today, we can make tomorrow's world a better place.

Spec check: how Milliken adds up

Pts avail.	LEED requirement	Contributing Milliken product(s)
LEED for New Construction and Major Renovations (LEED-NC) and LEED for Commercial Interiors (LEED-CI)		
1	Low Emitting Materials: Carpet	Every carpet Milliken manufactures — every design, every construction, every division.
1	Low Emitting Materials: Adhesives and Sealants	Bio-based TractionBack™ requires no adhesive, making it optimal. We also offer water-based adhesives. Both options meet requirements as low emitting materials.
2	Materials and Resources: Recycled Content	ES Backing System
2	Materials and Resources: Resource Reuse	Earth Square® renewed carpet — the only existing carpet in the industry classified as refurbished or reused.
2	Materials and Resources: Construction Waste Management	All Milliken carpet can be recycled or reused through Earth Square®, reuse or recycling programs.
2	Materials and Resources: Local/Regional Materials	Milliken carpet can contribute to this point for projects within a circle that encompasses the Milliken Live Oak plant in LaGrange, GA (roughly defined by Richmond, VA, Columbus, OH, Shreveport LA and Ft. Myers, FL).
LEED for Existing Buildings (LEED-EB)		
1	Indoor Environmental Quality: Green Housekeeping	For entryway systems, Milliken First Appearances® and Milliken Walk Off® Mats meet the requirements. The MilliCare® franchise network and Milliken Walk Off Laundry partners provide cleaning strategies.
5	Materials and Resources: Optimize Use of Alternative Materials	<ul style="list-style-type: none"> • For the salvaged material requirement, choose Earth Square® renewed carpet • To meet the 20% post-industrial requirement, specify Milliken's ES Backing System • Milliken can also contribute to the proximity requirement for projects within a circle that encompasses the Milliken Live Oak plant in LaGrange, GA (roughly defined by Richmond, VA, Columbus, OH, Shreveport LA and Ft. Myers, FL).
2	Materials and Resources: Optimize Use of IAQ Compliant Products	<ul style="list-style-type: none"> • All Milliken carpets meet or exceed CRI Green Label Indoor Air Quality requirements and contribute to LEED • Bio-based TractionBack™ requires no adhesive, making it optimal for the adhesives and sealants requirement. We also offer water-based adhesives. Both options meet requirements as low emitting materials.

Milliken also receives (1) one point for Innovation Design Process Credit for all LEED standards. Milliken modular carpet with ES backing has been certified as an Environmentally Preferable Product, SCS Sustainable Choice Gold. With the optional ESP backing, it has been certified SCS Sustainable Choice Platinum and California Platinum.
